Hemmer Foot

The hemmer foot, sometimes referred to as the rolled hemmer, is used to stitch the narrow rolled hems usually found on shirt tails, table linens and along the edge of frills. The hemmer is designed with a scroll shaped feeder on top and a straight groove on the underside which determines the width of the finished hem. The 4mm / 6mm Set will allow for the use of heavier fabrics.

2mm Hemmer Foot recommended for very lightweight fabrics. Creates a 2mm to 3mm depending on the fabric

4mm Hemmer Foot recommended for light to medium weight fabrics creating a 4mm hem

6mm Hemmer Foot recommended for light to medium weight fabrics creating a 6mm hem

Part Number	Compatible Machines
200128001	Front Loading 5mm Machines (2mm hem) <i>Blister Pack</i>
